

# HALF A CENTURY AFTER HIROSHIMA

## NUCLEAR POWER PLANTS, THE PITS OF AHRIMAN

By: *SCIENTIX*

**(Editorial Note:** Fifty years back, on 6th August 1945, the first atom bomb was dropped on Hiroshima instantaneously killing 80000 people. Thousands were wounded and seriously affected by radioactive fall out. The humans on earth had taken a sharp turn towards the devil. Nuclear arms race began and still continues. As late as on 5th September and 1st and 27th October 1995, France conducted three underwater nuclear tests, against all the hue and cry of other countries.

Although no atomic or nuclear bomb was used as an actual war-weapon after Hiroshima and Nagasaki, new rackets were set in motion in the names of 'Atoms for peace', 'peaceful use of atomic energy' and 'cheap production of electricity'.

These 'peaceful' playing with the atoms has brought on the mankind a greater disaster than the war bombs. Nuclear power plants have become the most dangerous storehouses of Radioactive wastes posing a permanent threat to the very existence of the humans on the globe. They are the pits of Ahriman as described in our Holy Scripture Vendidad. This article takes you into the amazing depiction of these pits as given in Vendidad and shows how awesomely it applies to the present and future dumpings of nuclear wastes - **Editor).**

Vendidad is one of the 21 Nasks emanating from Asho Zarathushtra. It is an awe-inspiring Holy Scripture containing numerous mystical topics, arranged in a wondrous order. The Cycles of Time on the Earth; the Science of Chakhra's, the Energy Centres in man and on earth; the divine laws of Justice and Karma, Sin and punishment, rectitude and reward; Laws of Purification; Duty of man towards the ecology and elements of Nature; Life on Earth and after death; Asho Zarathushtra's divine Mission and combat with Ahriman; the end of the Evil and Frashogard of Creation - these are some of the topics. Vendidad is a Scripture in Manthric Words and has therefore multi-level meanings, requiring the application of Tavail, the science of deciphering. Unfortunately, the thin surface meanings given by the Western Studies have resulted in a complete misunderstanding, misconstruction and misinterpretation leading to a sinful blasphemy of the Holy Scripture.

Vendidad has 22 Chapters, termed as 'Pargarad's'.

In Pargarad 3, there is a wonderful dialogue between Ahura Mazda and Asho Zarathushtra. Asho Zarathushtra asks Ahura Mazda about five situations when the Earth feels ecstatic and blissful, and five other situations when the Earth feels distressed and tormented.

Passage no. 7 in the Pargarad states the question:

"Oh Creator of the Corporeal world, thou Holy One! Which is the first piece of Earth, that is distressed (tormented)?"

Ahura Mazda answered, It is in the neck of Areyzoor where the hosts of Daeva's (fiends, demons, evil creatures) rush from the Chasm of Druj, Oh Spitma Zarathushtra."

Further on, in the 10th passage Asho Zar asks

"Oh Creator of the Corporeal World,

Thou Holy One! Which is the fourth piece of Earth, that is distressed (tormented)?"

Ahura Mazda answered: it is where there are many many chasms (Pits) of Angra-mainyu (and his evil forces) Oh Spitma Zarathushtra!"

### **WHAT ARE THESE "NECK OF AREYZOOR" AND "PITS OF ANGRA-MAINYU"?**

Areyzoor is stated to be a mountain where the fiends, demons and evil creatures, rush and concentrate themselves, and from there they spread out evil and destructive fields in all directions. It is described in Pahalvi as "a mount at the gate of hell, whence the demons rush forth". In Vendidad paragarad 19-45 it is said that the evil demons, while running away from Asho Zarathushtra shouted: " Let us gather together at the head of Areyzoora". It is thus an abode of the evil beings, a'neck' where evil forces are accumulated and spread out their most destructive lines of force.

Similarly in passage 10 the Chasms and pits of Angramino are referred. At both these places the Earth is distressed, oppressed, and tormented.

Are these places just a figurative and imaginative descriptions or are they existing somewhere? The peripheral study of the Western scholarship thinks that these were the places where dangerous animals and creatures like snakes and scorpions lived. Vendidad being a book of primitive Religion refers to such things experienced by primitive people. That is the beginning and end of that study.

But TODAY there exist on the surface of the earth several pits of Ahriman. And a big mountain to concentrate the evil energies and forces is being contemplated by the present day humans.

#### **424 + 1 HUGE, TORMENTING PLACES**

Those pits of Ahriman are the 424 NUCLEAR POWER STATIONS situated in 33 countries. They are the generators of tremendous nuclear wastes, which threaten the very existence of all life on the globe. The present-day humans, who have with their insane concept of conquering Nature by their science, are now themselves mortally scared at the monstrosity of their self-generated nuclear wastes, and are planning to build a repository for them at Yucca Mountain in southern Nevada about 100 miles from Las Vegas, by 2010 A.D.! Ahriman is preparing the humans to build another Neck of Areyzoor, where 70,000 metric tons of the most dangerous nuclear wastes are proposed to be dumped. The project is so monstrously huge, uncertain and dangerous that nobody is sure whether it will at all materialise. In the meantime 109 nuclear plants in U.S.A. alone will accumulate 48000 tons by 2003! And what will happen to the wastes in 32 other countries where 313 nuclear reactors are operating, nobody knows!

424 pits of Ahriman exist today and are tormenting the mother earth. Mount Areyzoor is in preparation at Yucca.

Is VENDIDAD A PRIMITIVE BOOK?

#### **THE BIRTH-STORY OF THE MODERN 'AREYZOOR'**

But let me tell you the story from the beginning.

It was the fourth decade of the 20th Century. The humans of the Mother-earth were engaged in a most deadly war. The weapons of destruction were very ingenious and very sophisticated. They were the supreme product of human intelligence and its crafty and clever activity, SCIENCE.

In a busy city in the Northern hemisphere of the globe, it was 8 O'clock in the morning. Mothers were sending their children to school. Fathers were preparing to go to work. For old people, it was one more day.

A small looking plane appeared at the outskirts of the city. War was going on, and one plane in the sky was nothing to bother about.

But this plane was carrying hell. At 8.15 a.m. the hell rained ..... 80,000 people were killed. Thousands living felt as if they were on fire from within. They rushed to the sea, fell into water and waited for death, which obliged many of them. For those who lived, earth was a burning inferno.

#### **'FAT MAN' AND 'LITTLE BOY'**

The day was 6th August 1945. The ill-fated city was Hiroshima. The plane was B-29 bomber. Its name was Enola Gay. It had started five and a half hours before, from a small island, Guam, in the Pacific. America did this to avenge Pearl Harbour and end the war. On August 9, another Atom bomb was dropped on Nagasaki. Hiroshima bomb was war-coded as "Little Boy" and Nagasaki's "Fat Man".

And the war did end. Half a century has gone after 6.8.1945, but the humanity is not the same as before. It is irreversibly revolutionized, and galvanised towards Devil. Earth, water, air atmosphere have also changed incurably and irreparably. The major Nations went on and go on testing nuclear weapons. France did it on 5.9.1995 and 1.10.1995. Each test was a triumph of Ahriman. Radioactive radiations enwrapped the Earth and its inhabitants. Both the exterior and interior of the humans were in the grip of death and torture. Blood Cells which multiply in the bone marrow, cellular linings of the intestines, and the germ cells of gonads are found to be most susceptible to radiations. With low dose levels, cancer develops, after years, in parents and progeny both, and genetic defects are stored in, which may show their effects after decades and generations.

#### **THE DEVIL'S SNARE**

After that disastrous day of 6th August 1945, the lure of the devil began working in its usual tempting ways. Forget Hiroshima; we will use atomic energy for peaceful use. We will generate electricity in nuclear power plants. For our children, electricity will be "too cheap to meter", said Lewiss Strauss, Chairman of U.S.

Atomic Energy Commission. In 1953 President Eisenhower unveiled his "Atoms for Peace" program. So, on the one hand, nuclear arsenals were stock piling, and on the other, the lure of power plants for peaceful use was snaring the humans.

It is now found that those peaceful power plants are more dangerous for human survival than the bombs, because of the radioactive wastes they accumulate. The problem is: where to throw or stock these wastes. The Earth with all its depths within the ground and underwater, and its atmosphere going very high up is too small a globe for the purpose.

There are several ways by which these wastes are generated in power plants. Spent-fuel waste is the major ingredient. It is intensely radioactive. Every nuclear power plant has a water pool to store the waste, but that is a temporary arrangement. The waste is required to be taken somewhere, at some safe place. The humans are fanatically searching for such place - but there is not much hope.

### **AHRIMAN'S LAUGH**

The method of Ahriman is well-documented from the days of Zohak. He lures the humans to walk in a flower garden. Gradually the ground below and the flowers around become hotter and uglier. The humans first try to explain this away by some 'Science' which Ahriman himself has put into their heads. As they walk on, a point comes when they wake up at the ghastly and ruinous situation surrounding them. They look back. But it is too late. There is no escape. Everything at the back is also on fire. Situation is irreversible. And Ahriman laughs heartily.

Beware, Lord Buddha said, the arrows of Mara (the devil; tempter) are flower-tipped. Tipped with soft velvety flowers but dipped in deadly poison.

Yes! Ahriman is having his laugh. The first large scale power plant at Shipping Port (Pennsylvania) established in 1957, was dismantled in 1980. Others are closing down for economic reasons. About one-fourth of the remaining may shut down by 2003. Atoms for peace is a huge failure. But that is not a relief. It is a horror. Where would you store the decades old waste of the closed plants? You can't just close down and walk off. The Nuclear Regulatory Commission of U.S.A. has framed rules for closing power plants. Within two years of shutting down, file a plan about decommissioning. You can then wait and sit idle for 60 years, until the radioactivity dies down considerably! But sitting idle is not possible. An idle reactor requires monitoring, and this can cost up to 15 million dollars a year!

### **MARCH TOWARDS MOUNT YUCAA**

Now let us talk a little more about the Neck of Areyzoor, in preparation at Yucca Mountain in Nevada. All nuclear waste will go there, declares the America's Waste Act 1982, as amended in 1987. When will this "facility" be available?" Perhaps in 1998 - or may be 2003 - or even 2010 A.D. Nobody is sure and even serious about these dates. They say, Yucca "is made of vast layers of porous rock called tuff, which contains minerals that are expected to act as a natural barrier to the movement of radioactive waste". (Popular Science - August 1995 - "50 years after the bomb - The Nuclear Legacy" by Dawn Stover. Much of the scientific data written here is from that article. Grateful Acknowledgements to the magazine and the Author, Stoner).

It is proposed that the massive containers of the Waste will be dumped into 100 miles long tunnels, 1000 feet below the mountain surface. They will remain there until the 50th anniversary of the opening date of the Devil's Neck. But they are not yet sure about the wisdom of the project. The garbage that will be dumped in will remain for 10,000 years. **The study of the site to find out the feasibility of the whole project is at present costing One million dollars a day!** Will the project invite earthquakes and volcanoes? Will it affect movements of water and patterns of weather? Will it destroy the already endangered species of desert tortoises? Two scientists from Los Alamos National Laboratory have warned that there is a possibility of a powerful nuclear explosion at the mountain. But that may happen after thousands of years.

### **THE LAST WILL AND TESTAMENT OF THE 20TH CENTURY HUMANS**

"This 6th/9th day of August 1995, fifty years after Fat Man and Little Boy, We the humans of the 20th century do give, devise and bequeath, by this our Will, to our progeny and descendants, out of our most natural love and affection for them, the Devil's Neck we are going to build at Yucca Mountain Nevada, near Las Vegas, to be enjoyed by them absolutely and without any hindrance from any persons (including the Greens and the Priests, if any) for next 10,000 years or till its annihilation by explosion whichever is earlier, and also all the other Devil's pits and Chasms, being the nuclear power plants, factories and arsenals till they are closed down and thereafter AND we do hereby appoint, our beloved, cherished and esteemed friend Ahriman, the Scientific planner thereof and all his Satellites, as the Executors and Trustees hereof, in whom

we have implicit Faith like the faith a few fools have in an antiquated and primitive shepherd by name Jesus Christ."

### **THE SINS OF MAN**

We have a Pahalvi translation of Vendidad. Pahalvi writers were much more versed in the mystical and spiritual teachings and truths contained in our Holy Scriptures than the European thin-surface study, which blasphemes them. While elaborating passage 7 of Paragrad 3, they say that in the neck of Areyzoor a male demon does "koon-marj" with a female-druj and spreads evil all over. 'Koon-marj' is the word for homosexual function. The message is that the sins of the humans, which have their climax in homosex, or unnatural sex are the causes of the calamities, like earthquakes, draught, epidemics, diseases and wars falling on them. These are germinated in the Neck of Areyzoor and pits of Ahriman, where the demons and destructive fields emanating from the sins of man accumulate, thrive and multiply. The nuclear destruction and the sins of man have a cause and effect connection and become vicious cycles.

How symbolic it is that Yucca Mountain is very near to Las Vegas, a small place, where most of the vices of man are collected?

Much of our world has become John Bunyan's 'miry slough of despond' –

"It is the descent whither the scum and filth that attends Conviction for Sin doth continually run.....  
(Pilgrim's Progress).

\* \* \* \* \*

**Remember, Vendidad is one of the Holy Nasks emanating from Asho Zarathushtra.**

---

### **“Hostile Forces”**

"Men are being constantly invaded by the hostiles (hostile forces) and there are great numbers of men who are partly or entirely under their influences. Some are possessed by them, others-few are incarnations of hostile beings. At the present moment they are very active all over the earth."

"The hostile forces are anti-divine, not merely undivine; they make use of the lower nature, pervert it, fill it with distorted movements and by that means influence man and even try to enter and possess or at least entirely control him."

**- Sri Aurobindo**

**(Parsi Pukar – OCTOBER 1995 Vol. 1; No.4)**
