

“TIME” DIVIDED

By : SAVAK S. MADON

A boy or girl, hardly seven years old surely tells you, immediately the formation of a year of 365 days as under :—

| | | |
|------------|---|----------|
| 60 Seconds | : | 1 Minute |
| 60 Minutes | : | 1 Hour |
| 24 Hours | : | 1 Day |
| 30 Days | : | 1 month |
| 12 Months | : | 1 Year |

But perhaps, even some “Khsnoomfidais” also take some time, before giving you a complete picture of the calculation of the “Time,” as per Zoroastrian system. To my opinion, the following gives us, all that we ought to know :—

| | | |
|--|---|--------------------------|
| 12 Breaths of a normal healthy person, while sitting | : | 1 Swanya |
| 80 Swanya | : | 1 Dakiko |
| 80 Dakikas | : | 1 Hathra |
| 18 Hathras | : | 1 Rooz (Day) |
| 30 Rooz | : | 1 Mah |
| 12 Mahs | : | 1 Saal (Year) |
| 81,000 Saals | : | 1 Zarwane Darego Khadata |
| 4 Zarvane Darego khadata | : | 1 Mahina Charkha |
| Imnumerable Mahina Charkha | : | 1 Zarvane Akarne |
| 7 Zarvane Akarne | : | 1 Yavaecha Yavaetat |

At present, we are living in Mercury Kotwali, of Sun Vazirat of Mars Sahenshahat of Mars Darego khedata, of some Mars Mahina Charkha in seven or eight Hazara of fourth Zarvane Akarne, and we are living approximately in 14561 year of the present Darego Khadata.
